

I would like to ask if anyone is currently working to find and prosecute the perpetrators of the Black Thursday incident that occurred over a year ago? Are there any MakerDao lawyers working on it? If so, are there any results of the investigation that can be published?

- If no one is looking into it, might it be worth considering that we already have the resources to somehow fight back against the attacker?

It would be worth devoting an appropriate amount of money to this, because it might be a deterrent for small fish to see that the Maker is not going to be robbed either, but will go after the perpetrators by any legal means.
