

Flood for Traders

Flood improve the trading experience in multiple ways:

- All trading is done with signatures and thus users don't need ETH to trade.
- For the point above, orders are explicitly signed by users, giving them full visibility into their trades.
- All Zones on Flood can access the [Optimal Fulfiller](#)
- , an innovative fulfiller developed by the Flood team to route trades at the mathematically proven optimal price.
- As its Fulfillers that execute orders, users don't have to worry about frontrunning and other forms of harmful MEV.

Using FloodSwap

Users can benefit from everything Flood has to offer by using [FloodSwap\(opens in a new tab\)](#) . FloodSwap is a Zone run by Flood team and leveraging the [Optimal Fulfiller](#) to give users the best possible prices.
