Name:

Matthew Eric Myers

Country of Residence:

United States of America

Educational Background:

Bachelor of Science in Supply Chain Management from Arizona State University

Professional Background:

Current:

NFT Trader, nftc.eth (top 100 most profitable wallet trading NFTs in 2021)

Prev:

Honeywell Aerospace, Commodity Manager (managed \$160m of metal components used in assembly of aircraft engines)

Viasat, Global Sourcing Manager (team lead for cross-functional group of buyers and planners who were responsible for \$10m in annual test equipment spend)

Cisco, Product Materials Manager

Nomination Statement

ApeDAO is paralyzed by inaction, red tape, and lack of consideration. We need leadership who will focus on moving fast, comprehensively, and with purpose. Vote for me (NFTC) - let's move ApeDAO forward.

Motivation

I'm running for Special Council on the promise that I'll change the pace of progress in Apecoin DAO.

Like many holders, I was extremely excited when ApeDAO launched. However, that excitement quickly turned to pain as I watched how slowly the DAO operated. It's hard to believe that the \$APE airdrop was in March - 8 months ago!

If elected, I'll leverage my experience in operations leading teams to deliver results against aggressive deadlines. I'll knock down glass walls and cut tape where possible, while abiding by compliance. I'll empower holders to once again actively contribute and feel that their voices and ideas are being heard.

Rationale

Beyond my experience streamlining processes and operations, I also have extensive experience scoping projects, costing, and sourcing. I believe that this skillset can be valuable to the Special Council and ApeCoin DAO.

In Web3 we tend to prioritize developers, influencers, and marketers, but the operational piece is often overlooked. In my opinion Apecoin DAO could benefit greatly from a operationally-minded addition to the Council.

Specifications

I was an active participant in the DecentralGames DAO and was one of the largest holders for several months.

Additionally, I founded an NFT trading group turned DAO. At it's peak it amassed over \$80k in contributions which were and are 100% devoted to the community (I was never paid).

I'm an experienced Supply Chain Professional who managed over \$160m in commercial and government aircraft component

My wallet is NFTC.eth

Concluding Statement

Don't hesitate to DM me on Twitter to chat. I'll also happily set up a phone call 1:1 or host a Twitter Space for all to join.

If elected, I'll maintain those open lines of communication via phone, email, DMs, and spaces on a full-time basis.

Remember, the Special Council is supposed to work for YOU! I'll devote my time to servicing the DAO and community with open doors.
