

# Hello ladies and gentlemen

**I would like to learn more about the delegation functionality.**

Will it be possible to move your tokens? which were delegated in favor of someone else.

What to do if a person thinks that the delegate he has chosen does not suit him and wants to change the delegate or even withdraw tokens. Will there be such an opportunity to manage already delegated tokens?

In my case, a mistake was made, I did not plan to delegate in favor of this wallet, but it happened. I want to change the delegate to a more reliable one. Can I do something about it? Also wondering when the tokens that have been delegated will be available
