

Hi - I know one of the most important components of AIPs are their respective KPIs/ROIs. Is there a good place to see progress being made across all accepted AIPs, what their original KPIs were and their progress in accomplishing them? I'd posted this on the transparency forum, but never really got info. (Apologies if this isn't the right place, I'd done a few searches and couldn't find a good place)

a) I know for each AIP we ask for KPIs/ROI to be tracked is there a specific location this information is collected?

b) There are a variety of positions within the DAO, some coming up for vote here soon, is there a place to see who are all of the individuals currently employed by the DAO?

c) Do we somehow track what different employees / working groups are tackling? What was completed in Q1 and what is being worked on in Q2?

d) Are there KPIs/ROI associated with those individuals that are being tracked? Akin to a quarterly or annual performance review.
