

A proposal was recently listed on [Mintscan](#) for a GRT-USD market. Chaos Labs supports the addition of GRT-USD to the dYdX Chain and recommends listing under liquidity tier 1.

In line with the criteria for introducing a new market, as detailed in the [v4 documentation](#), we present our analysis and the rationale behind our recommendation for GRT's listing.

## Analysis

GRT is currently listed for spot trading on exchanges, including Binance, Coinbase, MEXC, Bybit, OKX, KuCoin, Kraken, Gate, and HTX, with its launch on December 16, 2020 (CoinGecko). Recent 24-hour Perpetual volumes for GRT have also recently been north of \$232m, showing interest in trading it. With aggregate liquidity of \$2.1m within a  $\pm 2\%$  range, GRT's price stability is deemed robust enough against potential manipulation, qualifying it for listing on the dYdX Chain.

## Liquidity Tier Recommendation

GRT fulfills the requirements for a Mid-Cap asset as defined in the dYdX v4 [documentation](#), and, therefore, we suggest categorizing it under liquidity tier 1.

As outlined in the v4 documentation, liquidity tiers specify the margin requirements needed for each market. They should be determined based on the relative market's spot book depth and the token's market capitalization.

GRT aligns the Oracle liquidity requirement at 8 out of 9 Oracle sources. All 8 of these are both robust and queryable sources according to the [dYdX listing criteria](#). Below are the volume and liquidity depth metrics for the proposed GRT oracle sources:

Given that it meets the Mid-Cap criteria with 8 qualifying oracle sources, with an average of over \$100m in spot trading volume, we suggest listing GRT at a liquidity tier 1.
