

Who is this forum for?

This forum welcomes anyone

who is researching, developing, or generally interested in any of the areas of R&D that are applicable to Anoma and beyond

. Some topics include, but are not limited to, cryptography, compilers, programming language theory (PLT), distributed systems, peer-to-peer (P2P), economics, mechanism design and so on.

What can you find here?

In this forum, you can find questions, discussions, research notes and misc. formatted posts published as threads and topics in the forum. The forum welcomes anyone who is interested in posting topics, as well as engaging and participating in topics posted by others.

In alignment with the design principles of Anoma, this forum is not limited to blockchain R&D

- but rather explores research and applies research from first principles with the purpose of bringing public goods and tools that solve real-world problems for humanity.
