

According to [Lido: Execution Layer Rewards Vault | Address 0x388c818ca8b9251b393131c08a736a67ccb19297 | Etherscan](#), Lido now produced around 600 blocks per day. However, Lido now accounts for more than 30% of staking balance, which means it should produce around $7200 \times 0.3 = 2160$ blocks per day. Why Lido is producing so few blocks?
