

# Getting Started with the TypeScript Client

## Quickstart guides

There are multiple quickstart guides to get you up and running with the TypeScript client library for dYdX Chain.

### Run examples from the v4-client-js repository

- Clone and run the examples from the v4-client-js repository. See the following [guide\(opens in a new tab\)](#)
- to run TS client examples from the [Typescript client repository\(opens in a new tab\)](#)
- .

### Setup your own project

- Install and use the v4-client-js code as a package in your own software. You can modify this [example project\(opens in a new tab\)](#)
- to work for your API trading use cases.
