

So I tried to bridge my aave tokens from the Polygon network as I bought the wrapped tokens from Quicksnap, but when I transferred my tokens I accidentally sent it into the smart contract address. Is there anywhere I can get this back. Mine is a peculiar case because the address is on a different website altogether and not on etherscan.

Here's the link: <https://explorer-mainnet.maticvigil.com/tx/0x791bd5a24c3a075406e52572ed3f39045f3ed9bb78b61551889fa0d4c596c158/token-transfers>
