i got errors in aztec-sandbox:

maztec-1 | node WARN Simulated tx 06f5f029982338126a67798915cb0d7149882628170b8a608465fa7f12dae883 reverts:

if i remove SharedImmutable variables and their initialization + sign to constructor as private - contract deployment will work
fine

Please tell me what I need to do to initialize these variables?
