

Hi Fellas!

We're building DeFi deep analytics platform, where you can keep track of your portfolio across multiple blockchains & wallets. We've integrated Aave(V1 & V2) you can keep track of rewards including the Aave tokens you're getting for locking your liquidity in the governance with effective P&L & collateralisation ratio. Not only your live positions but we've also made tax friendly transactions page where you can get capital gains/losses, gas fees paid on all your txns. If you would like to give a try here's an invite: [Shunya - DeFi tracking simplified](#)
