

GM everyone,

As many of you are aware, I've been working on collecting data about AIP's and have creating a dashboard on it to help provide transparency about our voting habits in the DAO: [ApeCoin AIP Information Dashboard \(WIP\)](#)

As part of that project, I have been collecting data on the delegates and am here to talk about the state of our delegates, and how many of them are no longer active.

As of the last voting cycle (November 21st 2024 - December 4th 2024), we had 297 Delegates

that represent a total of 1341 Delegators

. (Note: This list contains only delegates that have at least one delegator assigned to it. There are various website that will show a higher delegate count with the difference being due to delegates having 0 delegators). However, of these 297 delegates, very few actually participate in voting. If you look you look at the dashboard (Column BG) you will see that around ~25-35 delegates participate in voting per AIP

.

This means a fairly large number of delegates are not actively participating in voting (specifically on AIPs), and I would like to take a moment to highlight them to hopefully showcase delegators who may not actually aware that their voices aren't properly being heard.

As of the previous voting cycle, 71 delegates (with 146 delegators) have not voted since the end of 2023, with a combined total of 3,051,240.605 \$APE

29 Delegates (with 103 delegators) have not voted since the end of June 2024. These delegates have a combined total of 6,743,820.488 APE

97 Delegates (with 168 Delegators) have never voted on an AIP

. These delegates have a combined total of 9,455,412.869 \$APE

Due to the large amount of data and information, I have moved everything on to Google Sheets. Please see the link below:

Please note, if an ENS Domain looks strange, it is most likely due to it pulling a Sub-Domain. Additionally this corresponding table pulled the first ENS of the potential plurality of ENS' for the corresponding address. So just because it lists one ENS doesn't mean it doesn't have other ENS'

## **Delegation Information**

This Sheet is private

In total this shows that we have 197 delegates who haven't been voting in the last 6 months, and who represent 417 delegators, with a combined total of 16,199,233.357 \$APE

. That number rises to 19,250,473.962 \$APE

if you include all of the delegates who have not voted on a single AIP.

While this does highlight that 100 delegates representing 924 delegators have participated in voting in the last six months, as I previously mentioned, only about ~25-35 delegates are actively voting on each AIP each voting cycle.
