

Hi everyone,

I want to introduce myself. My web3 name is EzR3aL and I have been into crypto since 2016.

Currently I am a delegate at the AaveDAO and I was able to gather significant voting power, which helped me become the biggest delegate there.

Now I would like to expand to Arbitrum, as I think that Aave and Arbitrum can heavily benefit from each other, especially with the upcoming launch of the GHO token on Arbitrum via CCIP.

Im not representing a company. Im just an individual who is into governance since 2020.

This will be my delegate communication thread.
