

Hello, my name is Jakson and I'm opening this topic to ask for help from AAVE's managers with a transaction error that I made myself, when trying to transfer my crypto funds from the LINK currency to my wallet I ended up putting the AAVE token contract number in the instead of my wallet number, I made this mistake because I was also going to transfer my AAVE funds to my wallet and when I added the tokem contract to my wallet I ended up getting confused when transferring.

Below is the hash of the transaction that proves what I'm talking about.

0xeac56d345bb9d4686409748e2cddc88a06ea680a2ddd777c5ffcae1750104502

please help me recover my crypto funds.
