

Installing tKey iOS SDK

Installation[^](#)

Swift Package Manager[^](#)

Add the tKey iOS SDK to your project[^](#)

1. In Xcode, with your app project open, navigate to **File > Add Packages**
2. .
3. When prompted, add the tKey iOS SDK repository:
4. `https://github.com/tkey/tkey-ios`
5. From the **Dependency Rule**
6. dropdown, select **Exact Version**
7. and enter `0.0.4`
8. as the version.
9. When finished, Xcode will automatically begin resolving and downloading your dependencies in the background.[Edit this page](#) [Previous Overview](#) [Next Initialize](#)
