

GMX should add Across Protocol (@AcrossProtocol

) as a recommended fast bridge to send ETH to Arbitrum. Right now I see fast bridges recommended on the "Sending Tokens" section of github.

GMX can earn referral rewards for sending volume to Across thru this link. They can also pre-populate the link with desired bridging chains/assets as per below:

[https://across.to/?from=1&to=42161&asset="ETH"&referrer=GMX_Wallet](https://across.to/?from=1&to=42161&asset=)

GMX_Wallet = Ethereum Wallet Address for GMX to accumulate \$ACX rewards

Across is the fastest, cheapest and most secure cross-chain bridge for assets between Ethereum and Arbitrum.
