

A small UI suggestion would be to add an option when clicking the “claim” and “compound” buttons to allow users to choose to convert WETH to GMX, in addition to the current option of converting to ETH. This would allow users to choose whether to receive their rewards in ETH or GMX (which could be automatically exchanged from Uni LP pools or via two Metamask pop-ups), providing a Pareto improvement that would benefit long-term GMX holders and increase GMX purchasing power. This change is not complex to implement.
