WE WERE AT 100 EVENTS TO SPREAD APE VIBES, YES.

[URL - X/Twitter mutantsbeer](#) // [URL - MutantsBeer Website](#)

We spread the ape vibes, Apecoin and web3 culture

by placing thousands of mutantsbeer cans everywhere around Europe as if it were a flag. We're bringing the ape revolution and web3 culture to new enthusiasts

while bringing apes together

- you know, apes love ape stuff.

MutantsBeer brew premium craft beer

(high quality hops) and create different can designs with different Apes and NFTs. People started collecting them but it became impossible because...

We are creating over 100 different can models for Apefest 2024!

We have been designing the foundations of what the future will be. We went to over 100 events

in just a little over a year, in 10 countries, 15 cities

with brands that are leading web3 and building amazing things. We learned firsthand what's going on here to push things forward.

Mutantsbeer It's a 440 ml can

, Lager

(smooth flavor, for everyone), gluten free

(allows intolerant people to drink it) and it's green

. We took that part of the recipe from St. Patrick's Day

in Ireland where there is a big party with green beer and is an invitation for people to discover more about our story (BAYC drank serum).

If you're not familiar with special beers, you may not know some important differences.

There are two main types of beer: Craft beer and industrial beer.

- Industrial beer

has ingredients like rice and corn and is designed to reduce production costs.

It is standard, has few details in the flavour and always tastes the same from batch to batch.

- Craft beer

, brew in small batches, with high quality ingredients

like hops, and you know, you have different types of hops that you can combine to give it different flavors.

We say mutantsbeer it's premium craft beer

because of the way we design it. We have focused a lot on creating a beer where the important thing is quality

, selecting only the best ingredients

because we are true beer geeks.

We brewed beer with geeky friends

before to jump to factories and we are originally from the region where 90% of our country's hops are produced

(north of SPAIN), so we love this stuff.

We are now part of ThankApe BBAC accelerator program

something that will boost our journey and we are excited for what is to come.

We are also working on a big announcement coming out soon that will drive more people to build with their IP.
