

When are APE COIN holders getting airdropped NFT or rewards.

I believe holders of APE COIN. Should Receive a NFT for example .

Maybe a BAYC 2.0 for supporters and holders of APE Coin & early buyers of the coin when it went live on the markets .

APE COIN gained people like myself access to this community & space through affordable means. Now being a part of this great community.

Meaning bridging the gap and bringing more people to connect and get involved with web3 etc .

I find this brings so much value in terms of users and community & give people like myself access to read everybody's ideas and get a greater understanding of all this new technology. & the future in my eyes .

Without owning an NFT at all I feel I will be limited within the metaverse etc . And will not have access further down the line .

I'm sure people would love the idea of a BAYC 2.0 etc . So we can all grow as a community within web3 space going forward .
