

[Initially posted on Twitter on March 31st - reposting her to keep better track]

Today marks my first 3 months as @ApeCoin

Metaverse Steward, time for an update... As the budget is not passed yet (voting ending next week) many activations are waiting for funding. A big thank you to @HorizenLabs

for their vote of confidence during the election and for the first budget.

- ApeCoin DAO Otherside Strategy: The AIP idea was up for discussion for a few weeks leading up to a poll to let the community decide how much should be requested. In the end the amount of 800k USD was voted. I'm finalizing the AIP and plan to post the update within the next 10 days.
- Sandbox Experience: The project will be posted for discussion in the forum soon allowing studios to submit a proposal to work on the project.
- ApeCoin Builders Assembly: I'm super excited about this one and It's been a top focus for me. The Assembly will allow builders from the APE community to access resources and help for their projects. I'll be speaking at the BananaConf in Tallin in a few weeks and will introduce it during the talk « Building the ApeCoin Creators Assembly ».
- IRL: I'm attending as many web3/Crypto events as possible, from NFT Paris to Paris blockchain Week (9-11 April), BananaConf in Tallin at the end of the Month and Lisbon in May, to meet builders. Make sure to reach out if you are around, I'd love to connect!

Oh and yes, I'm working with the @BananaCorpXYZ

team (hi Sander!) to do some cool stuff in Tallin...

- Sponsorship: codename « ApeCoin Mania », more on this soon but expect some cool stuff happening in web3 games and metaverse with \$ape prizes... Already secured a few partnership for Q1!
- Meta Monday space: 13 show so far with many more to come. A big thank you to the special guests who participated so far.
- Legal Structure: The non-profit DAO LLC is being created by the firm Meta Law, it will act as the wrapper to the activities and as grant recipient for the Metaverse WG budget.
