

Hello !

Normally only AAVE and/or stkAAVE token holders receive governance powers proportionally to the sum of their balance but not stkABPT

I do not know if it is a will of departure, if it is possible or not but protecting the safety module and locking Aave token I would like that it is possible to have right of vote via the sktABPT

It's possible to vote on snapshot yes but not for AIP for the moment.

Best Regards

Mr_Aave

- Yes I would to add voting powers to stkAbpt
- No i wouldn't to add voting powers to StkAbpt
