

Hello,

I am trying to figure out how I can undelegate SCRT and allocate them to a new delegate. When I use the Dapp SCRT Staking Tools I don't see my delegated SCRT.

Moreover I have some available SCRT and I would like to allocate it to my current delegate. Issue : I don't see who is my current delegate. Do you know how to see it?

I am using Math wallet.

Thanks for you help
