

Introduction

This document is a living document and can be out of date of advancements in the technology found in mevETH.

This document attempts to give the reader an introduction into the technology used in mevETH, but with most documents, it may be a starting point in an attempt to understand.

The MEV Protocol consists of 2 major products:

- An Liquidity Staking Token (LST)
- An Blockspace Auction House

Follow these links to:

- To get an simple understanding of [mevETH](#)
- To understand more about the [contracts](#)
- To see some 3rd party opportunities for [more yield](#)
