

Snapshots

Creating Snapshot

Create folder for snapshots

...

Copy mkdir-pHOME/snapshots/canto

...

Clone github repo

...

Copy gitclonehttps://github.com/SiddarthVijay/cosmos-snapshots.git cdcosmos-snapshots gitcheckoutpatch/v1-canto

...

Create new snapshot

...

Copy ./canto_snapshot.sh

...

Automation

You can add script to the cron

...

Copy

start every day at 00:00

00***/bin/bash-c'/root/canto_snapshot.sh'

...

Consuming Snapshot

Snapshots also available on [Polkachu](#)

Use Snapshot

Backup HOME/.canto/priv_validator_state.json (cannot be recovered after following steps)

...

Copy sudosystemctlstopcantod cantodunsafe-reset-all cdHOME/.cantod wget-O.tar tar-xvf.tar

...

Restart Node

...

Copy sudosystemctlstartcantod

Watch logs

journalctl-ucantod-f

...
