

I've been working on Evil Studios for quite a while now, started off with acquiring some minor things followed by discussing plans about execution of various things such as gaming assets, phygital NFTs using NFCs on merch and marketing materials for clients. Delivered some products in stealth since 2023.

One of my primary goal before setting up Evil Studios was to get into the club; worked hard for an year and saved enough ETH to finally get a mutant without financial burden irl. Second thing was applying for a Made By Apes license which is in progress. Shoutout to Faraway team on discord who were gigachad enough to trust me with this when I told them I am trying to remix a song since the soundtrack got hold of me while playing DDU daily.

My goal with Evil Studios to make stuffs that are extraordinary in web3 and blockchain; thats why I proposed to make \$ape branded shoes, no company or protocol has ever decided to make their own shoes as merchandise. Everyone preferred to offer their community simple merch drop such as Tees, Caps, Hoodies etc. And now with remixing this song with my MAYC #5241

I wanna create a new standard of using one's IP on chain.

I request you all to go and follow me on X and subscribe to Evil Studios' channel on Youtube!
