

Getting Token Information

Retrieve information about a Token. The complete API documentation for our/token endpoint can be found[here](#) . To retrieve information about a token include the chain's id or key (for examplePOL) and the token's address or symbol (for exampleDAI) in the query parameters.

The chain's id or key can be retrieved by[querying our /chains endpoint](#) .

...

```
Copy const getToken = async (chain, token) => { const result = await axios.get('https://li.quest/v1/token', { params: { chain, token, } }); return result.data; }
```

...

The result for a request with chain: 'POL' and token: 'DAI' will look like the following:

...

```
Copy { "address": "0x8f3cf7ad23cd3cadbd9735aff958023239c6a063", "symbol": "DAI", "decimals": 18, "chainId": 137, "name": "(PoS) Dai Stablecoin",  
  "coinKey": "DAI", "priceUSD": "1",  
  "logoURI": "https://static.debank.com/image/matic_token/logo_url/0x8f3cf7ad23cd3cadbd9735aff958023239c6a063/549c4205dbb199f1b8b03af783f35e71.png"  
}
```

...
