

# How to add a token to the Orca Token List

To provide a better user experience, only tokens listed on CoinGecko, or manually added to the Orca Token List appear in the UI.

A request can be made to add a token to the Token List , either when creating a new pool or at any time by completing [this form](#) .

If you are a power user and want to create an initial pool for a token that is not on the Orca Token List, please see [How to create an initial pool for an asset](#) ).
