

We need to create an OVERSIGHT TEAM - Please stop flagging this, it is just a discussion, I have not made any direct accusations in this topic.

We need to create a process that can deal with issues of inappropriate behaviours, worrying trends, outright bias behaviours, a point of contact for DAO members and public to report concerns and information, dealing with complaints, and this needs to have powers across the board relating to the the COUNCIL [if needed], APECOIN TWITTER, DISCORD and all other influential and related services the DAO operates [now and in the future] and its teams. I guess I see it as a kind of internal codes and conduct team with the powers to act fast.

We need to hold people accountable for their actions and have a dedicated team monitoring and protecting all of our interests, stopping collusion, a place for complaints and reports of inappropriate behaviours etc, as I am shocked at what I am seeing lately and how easily people can be sidelined and ignored or totally shut down, a DAO should not do this, it should not be run by the few.

The team should be elected, have final say, have powers, be easily contactable for everyone and have timelines in place for replying and dealing with inquiries and reports.

This is not a thieftom for people to do as they please, it is and should be an opportunity for all those that want it and want to do something to better the community. Our DAO should be just and fair and deliver services unbiased and correctly always, and if not then they will be stopped by the OVERSIGHT TEAM.

We need this, as any large organisation with a large amount of funding would. I have no idea of costs and am not qualified and would not like to take on the responsibility for creating this proposal, but it needs to be done ASAP and get it in place and elected, fully operational, quickly. I also feel the team should be changed every 12 months, to stop collusion etc and they should be well paid positions.

Proposals submitted to the AIP Ideas category can be vague, incomplete ideas. Topics submitted here are not required to be submitted as a formal AIP Draft Template, however, you may still use the [template](#) if you wish.
