Prepare to embark on an inter-dymensional journey as we depart from 35-C and introduce a whole new exciting and colorful dymension, the long-awaited Incentivized Testnet.

First, let's recall what 35-C, [Dymension's first testnet](#) brought us:

- The first ever fully modular testnet for RollApps.
- The first IBC-enabled rollup in blockchain history: RollApp X; and its brother-in-arms, EVM RollApp the first ever EVM

IBC-enabled rollup.

Up until now, the Dymension network (35-C) has been a gated domain, allowing only Dymension's core team to deploy RollApps. This is about to change. It's time to reach uncharted realms. We're about to turn the tides and morph Dymension's testnet from a permissioned arena into a permission-less deployment testnet.

A new Dymension

is coming: Froopyland!

Froopyland is a monumental leap towards realizing Dymension's grand vision — the internet of rollups, a public network of networks where we test how a crypto-native internet can look and feel. An internet where every server and every application is an IBC enabled instance able to prove its validity to all.

The Incentives

Froopyland, in its grand design, is not just about tech brilliance — it's also about stirring enthusiasm and distributing DYM(

Dymension's native token) to a community committed to Dymension's vision. Therefore, for a significant part of its journey through time, Froopyland is set to offer incentives.

Step into the mind bending world of Froopyland, where 1% of Dymension's total supply awaits the builders, Dymension community and hardcore Rollapes

RollApp Deployers — 4M DYM

RollApp Deployers (bearing the RollApp-fam Discord role):

40% of the reward pool awaits. The Dymension [Portal](#) will be a panoramic display of diverse modular RollApps. Think [coinmarketcap](#) but instead of coins, RollApps. Worth mentioning, this opportunity is reserved for Dymension community members with the RollApp-fam role. The key to unlocking these incentives lies in deploying a RollApp (made extremely easy with the help of the [Roller tool](#)), with rewards distributed in proportion to the RollApp uptime (Bonus for RPC endpoints availability)

. If you don't have a RollApp-fam role but you're a true builder [contact us](#) to describe your experience and your RollApp idea.

Validators — 4M DYM

Froopyland Validators:

In recognition of your future and past efforts in bootstrapping the computational force that secures the Dymension Hub and RollApps, we dedicate 40% (4M DYM) of the incentive pool to the Dymension Hub validators. In order to tap into this reward pool, each validator team is required to deploy its own flagship RollApp. The distribution will be proportional to the uptime of the validator and the RollApp your team deploys.

Testing users — 1M DYM

Testers:

A sweet 10% of the reward pool has been reserved for:

Rollapes

(a new Discord role that will be introduced soon) — those of you who wisely interact with the testnet. each one of you, irrespective of your technical skills.

Top 10 RollApps — 1M DYM

Top 10 RollApps, the crème de la crème:

This is the opportunity to hit it big folks! and we mean BIG. We've set aside a handsome 10% of the reward pool; 1M DYM for the 10 most awesome RollApps. Strive for excellence, reach for the stars, and your efforts may earn you a stake in the internet of RollApps.

Top 10 rewards will be distributed into three brackets:

1. Tier 1:

The top 3 RollApps will receive an equal share of 200K DYM each.

1. Tier 2:

RollApps ranked 4, 5 and 6 will receive an equal share of 100K DYM each.

1. Tier 3:

Each of the last 4 performers will receive an equal share of the 25K DYM.

Dymension will launch with a 1B DYM supply. Crunch the numbers yourself and understand the magnitude of this opportunity.

So, sleeves up, get creative, and start building as a new dymension is coming to the internet. Stay tuned for the upcoming announcements and the release of the new docs.
