

Hello ApeCoin Community,

I have tried to reach out to ApeCoin support with no luck. I purchased a few BAYC and MAYC NFTs from the crypto.com chain NFT marketplace. I am wanting to transfer my NFTs from the crypto.org chain to my metamask wallet to make my claim for my tokens. However, I cannot figure out how to make the transfer since the NFTs are not on the ethereum blockchain. I am fairly new to the game and do not want to lose my NFTs by making a simple mistake. Any help will be greatly appreciated.

Freddie
