BOPE is mix of BOBO and PEPE, The Most Memeable Due on The Internet!

Our mission is to expose more users to Arbitrum Nova as we think the network is super undervalued.

Other than that, we are trying to make fun on the blockchain (Nova) and bring new users to Crypto and DeFi as Nova is gas friendly and requires to do multiple DeFi steps (Install Metamask, Buy ETH, Add Nova network, Bridge from Arbitrum One or Mainnet to Nova, Swap on DEX RCPswap.com or Sushi.com) in order to get some BOPE.

BOPE is safe, Openzeppelin ERC20.

100% of supply went to liquidity and burned!
