

Hi all

This is just for general discussion.

I notice that since the ApeCoin launch there hasn't been any major announcements from the DAO or BAYC. There is no clear roadmap with clear timelines as yet released. As a result, the overall price for ApeCoin has gradually declined as investors lose interest.

I wonder if there is a communication strategy for ApeCoin in development to ensure that investors are kept informed. Is BAYC or the DAO responsible for this?

Just wondering out loud.

Thanks everyone.
