

Hey Aave fam!

With the successful launch of v3 on mainnet and GHO hitting testnet. Centrifuge is incredibly excited for what this means for the RWA ecosystem. We've been talking with members across the Aave community and it seems everyone else feels the same way - RWA can be a big part of GHOs success.

I wanted to share some thoughts and news from our community with yours:.

- We shared some in-depth thoughts on the [Management and Collateral of a Stablecoin](#) recently. Short summary: Collateral can't be onboarded in a vacuum and has to be thoughtfully done. We put our heads together with one of the leading thinkers in the stablecoin ecosystem, Steakhouse Financial, to share our view here.
- The Centrifuge Credit Group has officially [launched and gone live](#). We see this as a critical tool for our community and the entire real world asset ecosystem. Our [facilitator perspective](#) outlines a GHO Facilitator that could specifically leverage the Credit Group for Aave's own needs. Please join our governance call [tomorrow on February 16th](#) to hear from them directly at their [inaugural meeting](#).
- We're hosting a small RWA event at ETH Denver on Tuesday March 1st and would love to see you there. Everyone is looking for the next bull cycle narrative but we know real momentum is built, [you can't just wait for it to happen](#) Email us at [marketing@centrifuge.io](mailto:marketing@centrifuge.io) if you're interested in attending!

All this excitement means one thing for us that I'll say simply: Centrifuge wants to be the first Real World Asset Facilitator for GHO.

We know we have the infrastructure, the know-how, and the ecosystem to be the best partner for integrating GHO with the real world. And we know there will be many RWA facilitators and room for many RWA engagements in the future. We want to build by example, and provide a GHO facilitator with a collaborative, governance-integrated, and scalable on-chain RWA approach. We're confident we can help set the tone for real world assets with GHO, just as we've done for [Maker](#) and [Aave](#) before.

As soon as the GHO facilitators are ready for onboarding, our next step is to post a formal facilitator proposal. We've begun preparing a draft already, so please feel free to [reach out to me on Twitter](#) or on Discord at Khan#2663 if you'd like to participate in providing some early feedback to us

I'd love to hear more from the Aave Community directly. How do you feel about Real World Assets? What are your biggest concerns? What RWA would you like to see GHO engage with? What would you like to see from the governance of facilitators? Of RWA collateral?

Would love to hear some thoughts from our friends and delegates: [@AaveLabs](#) [@lbsblockchain](#) [@WintermuteGovernance](#) [@Kene\\_StableLab](#) [@JesusCryptoPlaza](#) [@pennblockchain](#) [@fig](#) [@Llamaxyz](#) [@stani](#) [@Anjan-ParaFi](#)

We're looking forward to building with Aave!
