

seid keys delete

Delete keys from the Keybase backend.

Note that removing offline or ledger keys will remove only the public key references stored locally, i.e. private keys stored in a ledger device cannot be deleted with the CLI.

Usage: `seid keys delete ... [flags]`

Flags: `-f, --force` Remove the key unconditionally without asking for the passphrase. Deprecated. `-h, --help` help for delete `-y, --yes` Skip confirmation prompt when deleting offline or ledger key references

Global Flags: `--home` string The application home directory (default "`~/seid`") `--keyring-backend` string Select keyring's backend (`os|file|test`) (default "`os`") `--keyring-dir` string The client Keyring directory; if omitted, the default 'home' directory will be used `--log_format` string The logging format (`json|plain`) `--log_level` string The logging level (`trace|debug|info|warn|error|fatal|panic`) `--output` string Output format (`text|json`) (default "`text`") `--trace` print out full stack trace on errors Last updated on July 1, 2024 [add export](#)
