

BA Labs recently posted an introduction to Project Levon in the Ecosystem Discussions category. We are reposting the link in SAKURA for visibility:

[Introducing Project Levon: MakerDAO's Economic Risk Engine](#) [General Discussion

]/(c/general-discussion/89)

Background For over 4 years, Block Analitica has had extensive experience working with MakerDAO. As the [@Risk-Core-Unit](#), our mandate has included: (i) providing risk assessments, (ii) parameter proposals, and (iii) relevant tooling to assist MakerDAO in the management of a risk mitigated portfolio of collateral backing Dai. Over the years, Block Analitica has aimed to provide more open, scalable, and easily accessible tools that can benefit our in-house analysts as well as the Maker community ...
