

Hello, I'm wonder,

I've been here since the launch of GMX on Arbitrum and I have to say it's been and still is a crazy ride. We have reached many milestones along our journey.

We launched V2, which has achieved incredible results since its inception, even in a bear market with the lowest volume in recent years, which is incredibly respectable.

We have become the largest protocol on arbitrum with currently \$412M in TVL.

So we can say that that whole defi on the arbitrum is us. We are the arbitrum. As we could notice, the arbitrum experienced a large outflow of TVL. Arbitrum is starting to lose its dominance and awareness because nothing interesting is happening on it.

BUT

Arbitrum came up with a proposal Short-term incentive Program that we can and must decide on because we are the largest, most respected and most successful project on this chain. We as GMX received 8m ARB which represent 8 million votes.

We were able to see how incentives can revive the chain and attract new users. This program can help to grow our business a lot and revive trading on arbitrum and bring us more fees and attract more TVL. Therefore, I propose that we vote with our 8m votes on this proposal in the following order:

1. For up to 75M ARB

through January 31, 2024.

1. For up to 50M ARB

through January 31, 2024.

1. For up to 25M ARB

through January 31, 2024.

proposal :

Let's discuss this topic and get to the vote as quickly as possible. The future of arbitrum lies in our hands!
