

Hello Maker Core,

I hope this message finds you well. I wanted to reach out to the community and inquire about the monthly financial reports that have been a valuable source of information in the past. I've truly appreciated the clarity these reports have provided, going beyond individual on-chain transaction tracking to give a comprehensive view of the MakerDAO ecosystem.

In particular, I found the reports from the now discontinued core unit, "Strategic Finance," to be an invaluable source of insight. They've not only contributed to transparency but have also been instrumental in understanding the financial health and growth of the MakerDAO ecosystem.

However, I've noticed that these reports haven't been published since 2022-11, and I'm curious about their status. Are there any plans to continue these reports or a transition to a new format? As someone who has benefited from the data and analysis provided, I'm eager to see this tradition continue.

I believe that these monthly financial reports play a significant role in keeping the community informed about the health and performance of MakerDAO. They're not just documents; they're a bridge between the core of MakerDAO's financial operations and the broader community. The insights they offer are invaluable.

If there is a new group or core unit taking over the responsibility of preparing these reports, I would appreciate information on that as well. Knowing that this valuable resource is being continued in some form would be reassuring to many in the community.
