

Hey Arbitrum frens!

Our first guide, [The State of the DAOs 2023](#), launched. It focuses on DAO governance, providing a comprehensive guide to understand its framework, mechanisms and ways to contribute. As part of the guide, we've included our analysis on Arbitrum DAO.

As we're committed to the continuous improvement and development of the report, we'd love to hear the community's feedback.

We're especially interested to hear if we missed any ways to contribute to Arbitrum.

[Arbitrum](#)

## **[Arbitrum](#)**

Offchain Labs is a New York-based company building Arbitrum, Arbitrum One, and Nova, Layer 2 scaling solutions for Ethereum. Arbitrum launched on Mainnet on August 31, 2021, and on August 31, 2022, Arbitrum One and Nova upgraded to Nitro tech stack.

Please feel free to share your thoughts and suggestions on improving the guide.

Web3 Citizen Guide is an open-source project that aims to serve as a public good by helping Web3 enthusiasts become well-versed in current topics in the Web3 ecosystem.

Thank you!
