

Celer cBridge

[Celer cBridge](#) supports bridging of WBTC, BNB, BUSD and IBEX between Canto and numerous other blockchains, including Ethereum, Bitcoin, Polygon, Optimism, and others.

Using Celer cBridge

The Celer bridging process is identical regardless of whether you are bridging to or from Canto. To use the bridge, follow these steps:

1. Navigate to <https://cbridge.celer.network/>
2. **** and connect your wallet.
3. Under theFrom
4. section, select the network you would like to bridge from, as well as the asset you would like to send and its amount.
5. Under theTo
6. section, select the network you would like to bridge to (e.g. Canto).
7. Click theTransfer
8. button. If necessary, approve the outgoing asset.
9. On the modal that appears, click theConfirm Transfer
10. button.
- 11.

Supported Assets

Celer supports the following assets on Canto:

- [BNB](#)
- [BUSD](#)
- [WBTC](#)
- [IBEX](#)
-

Liquidity for these tokens can be found within third-party DApps such as [Velocimeter](#) .
