

title: [ARFC] AIP-381 GHO Peg Management Amendment

author: [@oneski22](#)

created: 2024-03-08

Per [AIP-381](#) ACI/GHO Stewards are able to increase the GHO interest rate by up to 100bps every 7 days to a maximum of 9.5% if the monthly average price of GHO stays outside a 0.995<>1.005 price range.

In light of evolving market conditions with Maker DSR being set to 15%, and other CDP Protocols following suit, this amendment proposes raising the maximum interest rate ACI/GHO Stewards can target to 20% up from 9.5%, and a maximum 7-day increment up to 250bps, up from 100bps should the monthly average price of GHO stay outside the same range of 0.995<>1.005 USD.
