Whitelabel PnP Web No Modal SDK

Web3Auth is fully whitelabelable with application branding to have a consistent user experience. All our SDKs support Whitelabeling, giving granular customization capability across all our offerings. The major benefit of the Plug and Play No Modal SDK is the flexibility in how you can make your own UI for triggering the login. Further, Whitelabeling enables you to customize the other aspects as well.

note This is a paid feature and the minimum pricing plan to use this SDK in a production environment is the Growth Plan . You can use this feature in the development environment for free. Within the Web3Auth Plug and Play No Modal SDK, whitelabeling can happen in 2 different places,

- Openlogin Adapter
- : The redirect screens while logging in and constructing the key, can be customized according to your
- · common as well. For this, you need to pass on thewhiteLabel
- configuration parameter to the openlogin-adapter
- .
- uiConfig
- : The UI components can be customized using theuiConfig
- · parameter while initializing the
- Web3AuthNoModal SDK.

whiteLabel?: WhiteLabelData;

â

The whitelabel parameter takes Whitelabel Data as input. The Whitelabel Data object takes the following parameters:

- Table
- Interface

WhiteLabelData

Parameter Description appName? App name to be displayed in the User Flow Screens. It acceptsstring as a value. appUrl? App URL to be displayed in the User Flow Screens. It acceptsstring as a value. logoLight? App logo to be shown on the light background (light theme). It acceptsstring as a value. logoDark? App logo to be shown on the dark background (dark theme). It acceptsstring as a value. defaultLanguage? Default Language to use. Choose from:* en * - English * de * - German * ja * - Japanese * ko * - Korean * zh * - Mandarin * es * - Spanish * fr * - French * pt * - Portuguese * nl * - Dutch * tr * - Turkish

. Default language isen mode? Choose betweenauto ,light ordark background modes. Default isauto . theme? Used to customize the theme of the login modal with the following options 'primary' - To customize the primary color of the modal's content. It acceptsRecord as a value. tncLink? Language specific link for terms and conditions on torus-website. See (examples/vue-app) to configure e.g. tncLink:{en: "http://example.com/tnc/en", ja: "http://example.com/tnc/ja"} privacyPolicy? Language specific link for privacy policy on torus-website. See (examples/vue-app) to configure e.g.privacyPolicy: { en: "http://example.com/tnc/en", ja: "http://example.com/tnc/ja", } export

name
â
```

The name of the application. This will be displayed in the key reconstruction page.

Standard screenwithout

any change

Name changed to Formidable Duo

logoLight

&logoDark â

The logo of the application. Displayed in dark and light mode respectively. This will be displayed in the key reconstruction page.

logoLight

on dark mode

logoDark

on light mode

defaultLanguage

Default language will set the language used on all OpenLogin screens. The supported languages are:

- en
- •
- English (default)
- de
- .
- German
- ja
- •
- Japanese
- ko
- •
- Korean
- zh
- - Mandarin
- es
- - Spanish
- fr
- •
- French
- p1
- Portuguese
- n
- •
- Dutch

dark

â

Can be set totrue orfalse with default set tofalse .

For Light:dark: false

For Dark:dark: true

theme

<u>â</u>

Theme is a record of colors that can be configured. As of, now onlyprimary color can be set and has effect on OpenLogin screens (default primary color is#0364FF). Theme affects icons and links. Examples below.

Standard color#0364FF

Color changed to#D72F7A

Openlogin Adapterâ

Web3Auth's Social Logins and Email Login run using the OpenLogin Flow. The whole OpenLogin user experience can also be whitelabeled using OpenLogin Adapter settings. For this, you need to pass on thewhiteLabel configuration parameter to theadapterSettings property of theopenlogin-adapter.

tip Checkout the <u>openlogin-adapter</u> SDK Reference for more details on different configurations you can pass for customizations.

Example^â

```
import
```

{

OpenloginAdapter

```
}
from
"@web3auth/openlogin-adapter";
const openloginAdapter =
new
OpenloginAdapter ( { adapterSettings :
{ clientId,
//Optional - Provide only if you haven't provided it in the Web3Auth Instantiation Code network :
"sapphire_mainnet",
// Optional - Provide only if you haven't provided it in the Web3Auth Instantiation Code uxMode :
"popup", whiteLabel:
{ appName :
"W3A Heroes", appUrl:
"https://web3auth.io", logoLight:
"https://web3auth.io/images/web3auth-logo.svg", logoDark:
"https://web3auth.io/images/web3auth-logo---Dark.svg", defaultLanguage:
"en",
// en, de, ja, ko, zh, es, fr, pt, nl, tr mode :
"dark",
// whether to enable dark mode. defaultValue: auto theme :
{ primary :
"#00D1B2", }, useLogoLoader:
true, }, }, privateKeyProvider, }); web3auth.configureAdapter(openloginAdapter);
```

uiConfigâ

The UI components can be customized using theuiConfig parameter while initializing the Web3AuthNoModal SDK. TheuiConfig parameter is aWhiteLabelData object which can be used to customize the UI components.

Example^â

from

```
import
{
Web3AuthNoModal
}
from
"@web3auth/no-modal"; import
{
WhiteLabelData
}
```

```
"@web3auth/base";
const uiConfig:
WhiteLabelData
{ appName :
"My App", appURL:
"https://example.com", logoLight:
"https://example.com/logo-light.png", logoDark:
"https://example.com/logo-dark.png", defaultLanguage:
"en", mode:
"light", useLogoLoader:
true, theme:
{ primary :
"#FF0000", secondary:
"#00FF00", warning:
"#FFA500", }, tncLink:
"https://example.com/terms", privacyPolicy:
"https://example.com/privacy", };
const web3auth =
new
Web3AuthNoModal ( { clientId :
"" ,
{\it //}~Get~your~Client~ID~from~the~Web3Auth~Dashboard~chainConfig~,~web3AuthNetwork~:}
"sapphire_mainnet", privateKeyProvider, uiConfig, }); Edit this page Previous Usage Next Custom Authentication
```
