Should the community delegate a working group to make recommendations on the liquidity mining program?

The community is struggling to determine a future for the liquidity mining program. I would like to gauge interest in setting up a working group to broadly analyze the following:

- (1) The efficacy of the initial liquidity mining program
- (2) What programs could be run moving forward

The recommendations of the working group would be non-binding

If this temperature check passes, I would like to do the following:

- (1) Solicit volunteers for this group in the forums
- (2) Determine an ideal structure for the working group and specific work product through a series of dedicated Zoom calls
- (3) Create a governance proposal to formally acknowledge the working group and its structure
