# getSignaturesForAddress

post https://{network}.g.alchemy.com/v2/{apiKey} Returns signatures for confirmed transactions that include the given address in their accountKeys list. Returns signatures backwards in time from the provided signature or most recent confirmed block.

Parar	meters
• -	account address
•	(optional) Config object:* limit:

- · before:
- o (optional) start searching backwards from this transaction signature. If not provided the search starts from the top of the highest max confirmed block.
- until:
- (optional) search until this transaction signature, if found before limit reached.

o (optional) - maximum transaction signatures to return (between 1 and 1,000, default: 1,000).

- · commitment:
  - (optional) Configures the commitment level of the blocks queried
    - Accepts one of the following strings: [
    - "finalized"

    - "confirmed"

    - "processed"]
    - For more info, refer to thisdoc

    - minContextSlot:
      - (optional) set the minimum slot that the request can be evaluated at.

#### Results

- signature:
- · transaction signature as
  - slot:
- - The slot that contains the block with the transaction
- err:
- Error if transaction failed, null if transaction succeeded.
  - memo:
  - Memo associated with the transaction, null if no memo is present
  - blockTime:
    - estimated production time, as Unix timestamp (seconds since the Unix epoch) of when transaction was processed. null if not available.

#### **Example**

#### Request

cURL curl --location --request POST'https://solana-mainnet.g.alchemy.com/v2/demo/' --header 'Content-Type:

#### Response

JavaScript {"jsonrpc" :"2.0" ,"result" : [ {"blockTime" :1654173549 ,"confirmationStatus" :"finalized" ,"err" :null ,"memo" :null ,"signature" :"67iWWgeXYSXxKmxMjAahr9ATXvv1SJoHedXYZxicFQtF4eFxCWJxUwEYczNbrua8pQAshmkf73gfAX5itutWTA7m" ,"slot" :136105283 } ],"id" :1 }

Path Params apiKey string required .custom-style { color: #048FF4; } For higher throughput, create your own API key Body Params id integer jsonrpc string method string params array params ADD

Response

# 200

Response body object id integer jsonrpc string result array of objects result object signature string Base-58 Encoded String - Transaction signature as slot int64 u64 - The slot that contains the block with the transaction. err string | null Error if transaction failed, null if transaction succeeded. memo string | null Memo associated with the transaction, null if no memo is present. blockTime int64 | null Estimated production time, as Unix timestamp (seconds since the Unix epoch) of when transaction was processed. null if not available.
