NFT Activity Webhook

Get real-time updates when an NFT is transferred from the NFT collections that you track using the NFT Activity webhook

Chain Mainnet Testnet Ethereum Polygon Optimism Arbitrum Base

Introduction

The NFT Activity webhook allows you to track ERC721 and ERC1155 token contracts for Ethereum, Arbitrum, Optimism and Polygon NFTs. This provides your app with real-time state changes when an NFT is transferred between addresses.

Example Response

When a token (ERC721 or ERC1155) from the token contracts that you are tracking gets transferred, you receive a response from the webhook that looks like this:

"0x000000000000000000000015dd13f3c4c5279222b5f09ed1b9e9340ed17185"
