Templates

We compiled a list of a few templates that you can use as a reference to build your own dApp.

Hardhat + React

https://github.com/FhenixProtocol/fhenix-hardhat-example

Has a basic contract, some tasks and a simple frontend (TODO: copy over from playground).

Nuxt 3 + Fhenixjs + Ethers.js + Bootstrap Starter

With this template you can easily start developing your Fhenix front-end app using Nuxt 3 (vue3).
