Installing tKey Android SDK

Add Web3Auth's tKey to Gradle â

In your project-levelbuild.gradle orsettings.gradle file, add JitPack repository:

dependencyResolutionManagement { repositoriesMode . set (RepositoriesMode . FAIL_ON_PROJECT_REPOS) repositories { google () mavenCentral () maven { url "https://jitpack.io"

// <-- Add this line } } Then, in your app-levelbuild.gradle dependencies section, add the following:

dependencies { // ... implementation 'com.github.tkey:tkey-android:0.0.5' } Latest-SDK Check theatest version of Web3Auth's tKey Android SDK and update accordingly.

Permissionsâ

Open your app'sAndroidManifest.xml file and add the following permission:

< uses-permission

android: name = " android.permission.INTERNET "

/> Note: The element must be a direct child of the root element <u>Edit this page Previous Web3Auth CoreKit tKey Android SDK</u>
