NFT Metadata Updates Webhook

Get real-time updates when metadata for an NFT is updated

Chain Mainnet Testnet Ethereum Polygon Optimism Arbitrum Base

Introduction

The NFT Metadata Updates webhook uses our patent pending metadata freshness technology to allow you to track metadata updates for ERC721 and ERC1155 token contracts on Ethereum and Polygon (Up to 3M contract/tokens per webhook!). This uses on chain and off chain indicators to notify your app when the NFT metadata is updated, such as during a reveal.

Example Response

When metadata for an NFT (ERC721 or ERC1155) is updated, you receive a response from the webhook that looks like this:

NFT Metadata Updates Response {"webhookId":"wh_yth2f9pn4kw69tav","id":"whevt_wqaweymxxhiylx5a","createdAt":"2023-09-18T18:08:13.472Z","type":"NFT_METADATA_UPDATE","event": {"network":"MATIC_MAINNET","contractAddress":"0xb2435253c71fca27be41206eb2793e44e1df6b6d","tokenId":"15489410","networkId":401,"metadataUri"
