Troubleshooting

Before creating an issue with EigenLayer support please check this page to see if you can resolve your issues. If you are still stuck, please create a support ticket

Getting "no contract code at given address"

If you are getting this issue then either you are using a wrong rpc in youpperator.yaml file or you have wrong smart contract address in yourconfig.

- Please make sure you have correct rpc (goerli rpc for goerli nodes, mainnet rpc for mainnet) and is also accessible via your machine
- Please find the correct smart contract addresseshere Previous Operator FAQ Next Restaking User Guide
