Random

Random is a library with utilities to generate random data.

Functions

randomUint8

Generate a random uint8 number.

Output:

- value
- (uint8
-): Is the random number.

randomUint16

Generate a random uint16 number.

Output:

- value
- (uint16
-): Is the random number.

randomUint32

Generate a random uint32 number.

Output:

- value
- (uint32
-): Is the random number.

randomUint64

Generate a random uint64 number.

Output:

- value
- (uint64
-): Is the random number.

randomUint128

Generate a random uint128 number.

Output:

- value
- (uint128
-): Is the random number.

randomUint256

Generate a random uint256 number.

Output:

- value
- (uint256
): Is the random number. <u>Edit this page Previous Context Next Suapp</u>
